- **Vue 3 · Nuxt · TypeScript · JavaScript**
- **React · Next.js**
- **Tailwind CSS · shadcn-vue · Figma**
- **Pinia · REST API integration**
- **PostgreSQL · Prisma · Supabase · Clerk · neon**
- **Python · Java**
- **Git / GitHub · Vercel · Cloudflare Pages**

PROFILE

Computer Science student at the Institute of Technology of Cambodia and front-end intern building production features with Nuxt, Vue and TypeScript. Comfortable turning Figma designs into reusable, well-structured components, and working inside an existing codebase's conventions.

EXPERIENCE

Internship Front-end developer
EKYC Solution Co., Ltd.
2026.05 – 2026.08

- Built features for a customer rewards admin dashboard used by a food and beverage brand
- Developed reusable interface components from Figma designs, following the team's existing conventions
- Implemented list pages with search filters, pagination and loading states, connected to the backend API
- Worked on a feature branch with senior developer code review before merging

Internship Front-end developer
T.O Group
2026.08 – Present

- *Continuing the same rewards dashboard project and team after the transition from EKYC Solution Co., Ltd.*

SKILLS PERSONNAL

Teamwork and collaboration · Self-learning · Time management · Open to feedback · Problem solving
